# **DETAILED ACTION**

# Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/29/05 has been entered.

# **REJECTIONS WITHDRAWN**

2. There are no rejections withdrawn.

#### REJECTIONS REPEATED

3. All of the 35 USC 103(a) rejections set forth in the final rejection of 3/29/05, pages 2-4, paragraphs 5-7 are repeated for the reasons of record. Applicant has amended claim 15 to recite heating between about 90 and 121 degrees C. However, such a temperature range is necessarily present in the sterilization disclosed in JP '950 because it discloses a retort sterilization process and 90 to 121 degrees C is a conventional range for a retort sterilization. Furthermore, optimization of ranges of a result effective variable is obvious and well within the level of one of ordinary skill in the art (MPEP 2144). It would have been obvious to have provided applicant's claimed range in order to provide improved sterilization of the food package.

Application/Control Number: 10/612,445 Page 3

Art Unit: 1772

### **NEW REJECTIONS**

4. There are no new rejections.

## **ANSWERS TO APPLICANT'S ARGUMENTS**

5. Applicant's arguments filed 8/29/05 have been carefully considered but are deemed unpersuasive.

Applicant has argued that neither reference is directed to maintaining dimensional stability and mechanical strength of a container subject to retorting temperatures. However, applicant recites in claim 15 "while simultaneously retaining a level of dimensional stability and mechanical strength" it is not clear what "a level" refers too, applicant does not recite in the claims how much dimensional stability and mechanical strength is retained. It is certain that JP '950 retains a certain level of dimensional stability and mechanical strength during the retort sterilization process since the package would be useless for storing food if the package were completely destroyed during the retort sterilization process.

Applicant has argued that Koskinieme and JP '950 are inconsistent since Koskinieme discloses fiber based packaging materials and JP '950 discloses an ethylene vinyl alcohol core layer. However, it is not inconceivable to use fiber based packaging materials with ethylene vinyl alcohol in a multilayer packaging material since both materials are well known in the packaging industry.

Art Unit: 1772

In response to applicant's argument that Koskenieme and JP '950 are inconsistent, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Miggins whose telephone number is 571-272-1494. The examiner can normally be reached on 1:00-10:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
